

Configure Anaplan

Configuring Anaplan for single sign-on (SSO) enables administrators to manage users of Citrix ADC. Users can securely log on to Anaplan by using the enterprise credentials.

Prerequisite

Browser Requirements: Internet Explorer 11 and above

To configure Anaplan for SSO by using SAML:

1. In a browser, type <https://www.anaplan.com/> and press **Enter**.
2. Type your Anaplan admin account credentials (**Email Address** and **Password**) and click **Log In**.

The screenshot shows a login form with two input fields: 'Email Address' and 'Password'. The 'Email Address' field contains a blurred email address. The 'Password' field contains ten dots. To the right of the password field is a blue 'Log In' button. Below the password field is a link that says 'Forgot Password?'.

3. To enable and configure SSO, the user must contact Anaplan support team and provide them with the email address for creating an admin account and IdP metadata XML file.

Required Information	Description
Metadata URL	The IdP metadata URL is provided by Citrix and can be accessed from the link below: https://ssb4.mgmt.netscalergatewaydev.net/idp/saml/templatetest/idp_metadata.xml

Note: The support team will configure the SP from the backend.
