Configuring Brandfolder for Single Sign-On

Configuring Brandfolder for SSO enables administrators to manage their users using NetScaler. Users can securely log on to Brandfolder using their enterprise credentials.

To configure Brandfolder for SSO through SAML, follow the steps below:

1. In a browser, type the URL, https://brandfolder.com/signin and press **Enter.**

2. You need to contact the Brandfolder support team.

3. You need to provide the IDP metadata to the Brandfolder support team.

The Brandfolder support team configures SSO settings and provides you ACS URL and SP-initiated URL.
