

# Configure Qualaroo for Single Sign-On

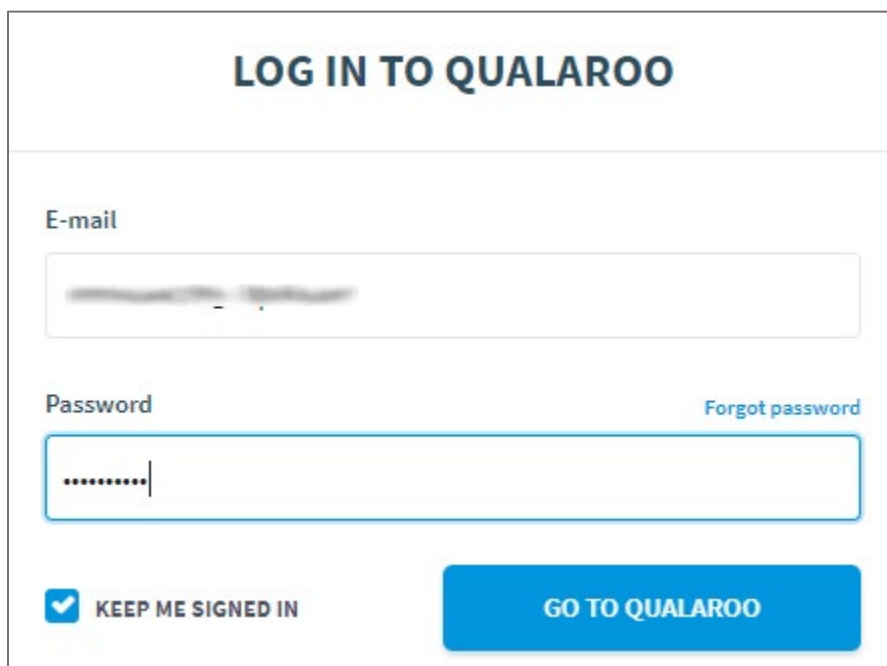

Configuring Qualaroo for single sign-on (SSO) enables administrators to manage users of Citrix ADC. Users can securely log on to Qualaroo by using the enterprise credentials.

## Prerequisite

Browser Requirements: Internet Explorer 11 and above

## To configure Qualaroo for SSO by using SAML:

1. In a browser, type <https://app.qualaroo.com/signin> and press **Enter**.
2. Type your Qualaroo admin account credentials (**E-mail** and **Password**) and click **GO TO QUALAROO**.

The screenshot shows the Qualaroo login interface. At the top, the title "LOG IN TO QUALAROO" is displayed in a dark blue font. Below the title, there are two input fields: "E-mail" and "Password". The "E-mail" field contains a blurred email address. The "Password" field contains a series of dots. To the right of the "Password" field is a link labeled "Forgot password". Below the input fields, there is a checkbox labeled "KEEP ME SIGNED IN" which is checked. To the right of the checkbox is a large blue button labeled "GO TO QUALAROO".

3. To enable and configure SSO, the user must contact Qualaroo support team and provide them with the following:

Required Information	Description
IdP metadata	<p>Copy and paste the IdP certificate. The IdP certificate must begin and end with -----Begin Certificate----- and -----End Certificate-----</p> <p><b>Note:</b> The IdP metadata is provided by Citrix and can be accessed from the link below. The link is displayed while configuring SSO settings for your app.</p>

	<a href="https://gateway.cloud.com/idp/saml/&lt;citrixcloudcust id&gt;/&lt;app id&gt;/idp_metadata.xml">https://gateway.cloud.com/idp/saml/&lt;citrixcloudcust id&gt;/&lt;app id&gt;/idp_metadata.xml</a>
--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Note:** The support team will configure the SP from the backend.
