

Configure SalesLoft for Single Sign-On

Configuring SalesLoft for single sign-on (SSO) enables administrators to manage users of Citrix Gateway service. Users can securely log on to SalesLoft by using the enterprise credentials.

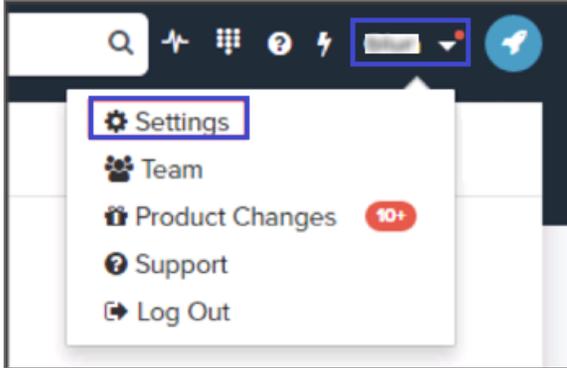

To configure SalesLoft for SSO by using SAML:

1. In a browser, type https://accounts.salesloft.com/sign_in and press **Enter**.
2. Enter your SalesLoft admin account credentials (**Email** and **Password**) and click **Login**.

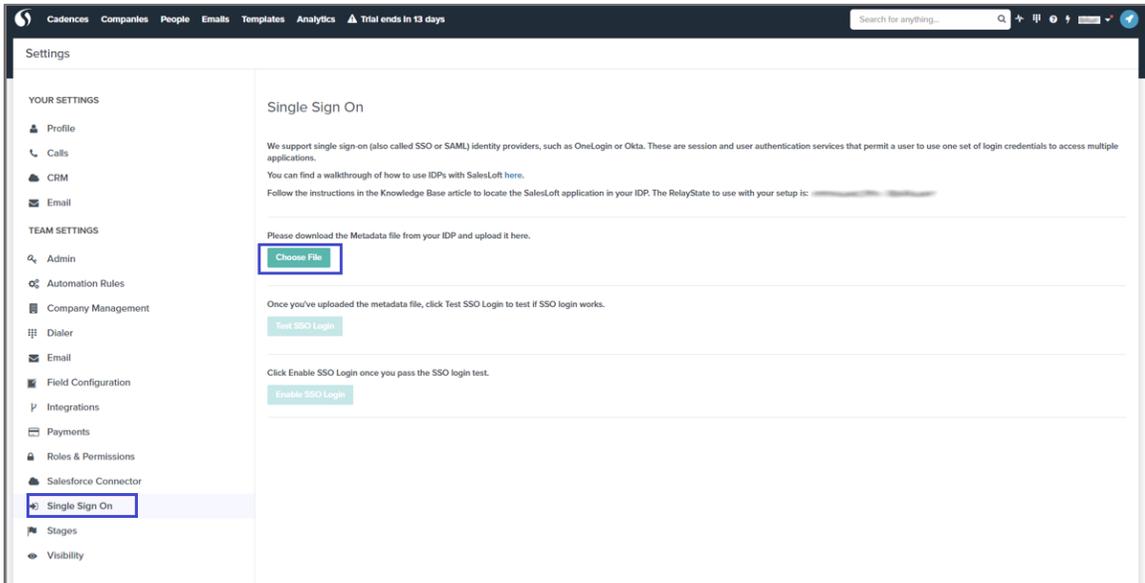

The image shows a screenshot of the SalesLoft login page. At the top, the SalesLoft logo is displayed. Below the logo is a text input field for the email address, followed by a password input field with masked characters. A link for "Forgot Password?" is located below the password field. At the bottom, there are two buttons: "Not a Customer?" and "Login".

3. In the dashboard page, click the account name in the top-right corner and click **Settings**.

4. In the **Settings** page, click **Single Sign On** in the left pane.

5. Click **Choose File** and upload the metadata file.

Required Information	Description
IdP Metadata	Upload the IdP metadata file. Note: The IdP metadata is provided by Citrix and can be accessed from the link below: <a href="https://ssb4.mgmt.netscalergatewaydev.net/idp/saml/templatetest/<app_id>/idp_metadata.xml">https://ssb4.mgmt.netscalergatewaydev.net/idp/saml/templatetest/<app_id>/idp_metadata.xml

6. Click **Test SSO Login** to test your configuration.

Note: If you have configured your account successfully, you will be redirected to the new sign-in screen and will be logged into SalesLoft.

7. Click **Enable SSO Login**.
