Configuring Workday

Users can securely log on to Workday using their enterprise credentials. To configure Workday for SSO through SAML, follow the steps below:

1. Log on to Workday as an administrator.

2. Click **Single Sign-on**.

3. Click the plus icon under Redirection URLs to add a row.

4. In the **Login Redirect URL** box, type [org URL]/login-saml2.flex

5. Click **Enable SAML Authentication**.

6. Click the plus (+) icon under SAML Identity Providers to add a row, and specify the following information:

   - Identity Provider Name - type Citrix Netscaler.

   - Issuer Name - type a unique issuer name.
