# Configuring Workpath

Configuring Workpath for SSO enables administrators to manage their users using Citrix Gateway. Users can securely log on to Workpath using their enterprise credentials.

Prerequisites

Click https://www.workpath.com and schedule a demo. The Workpath support team will provide you the account URL, and the metadata. Configure the metadata for IDP.

To configure Workpath for SSO through SAML, follow the steps below:

1. In a browser, type the URL, https://www.workpath.com and press **Enter.**

2. Click **Login here**.

3. Type **your account URL** provided by Workpath support and click **Continue**.

4. Click **Login with <youraccountname>**.
